New VAT rules for online sales

Due to new EU VAT legislation (effective July 1, 2021), the VAT rate of the destination country will be calculated instead of the Dutch VAT when shipping to another EU member state. On our website the prices are shown including the applicable Dutch VAT rate. Based on the country where the order will be delivered the invoice still needs to be adjusted. The final amount including VAT may then be higher or lower. This happens automatically (during the finalization of the order) on the check-out page. To avoid surprises, you can find an overview of the VAT rate per country below.

If you order as a green professional with a valid VAT number, the delivery will be an ICP delivery and the above is not applicable.
